

RESEARCH TRENDS IN ARTIFICIAL INTELLIGENCE IN THE MODERN WORLD

The Department of Information and Computing, in collaboration with the Office of Research, Innovation, and Commercialization (ORIC), at the University of Sufism and Modern Sciences (USMS) Bhitshah, organized an enlightening seminar on the "Research Trends in Artificial Intelligence in the Modern World." The event featured Dr. Ghulam Ali, a guest speaker from the Information Technology Center at Sindh Agriculture University, Tando Jam.

The seminar aimed to shed light on the latest developments and advancements in the field of artificial intelligence, which is transforming various sectors of the modern world. Dr. Ghulam Ali shared his profound knowledge and experience, captivating the audience with his insights on cutting-edge AI research. The seminar received immense appreciation from the esteemed audience, including the worthy Vice Chancellor of USMS, Prof. Dr. Parveen Munshi, who commended the efforts of the Department of Information Technology for organizing such a remarkable event. It served as a platform to promote collaboration, exchange ideas, and foster innovation in the field of artificial intelligence.
